RE: River's Edge Pavilion

Dear James:

We thoroughly enjoyed our partnership with Meco-Henne on the design and construction of River's Edge Pavilion at Tom Hanafan Park in Council Bluffs.

As general contractor on the project, the team was diligent in the value engineering process immediately after being awarded the contract. Your collaborative approach throughout construction was critical to delivering a successful project, particularly given the complexity and unique nature of the building.

Our teams were able to work through many important details on site, resulting in a superior final product, both as it relates to longevity and architectural aspirations.

We look forward to working with the Meco-Henne team on future projects.

Sincerely,

A handwritten signature in black ink, appearing to read 'RF' with a horizontal line extending to the right.
